

Debit and Credit Card Integration

Shortcuts Credit Card Integration

Convenient for you as well as your customers, Shortcuts Credit Card Integration will make you money while you are taking money!

Debit and Credit Card Integration

What?

Credit Card Integration captures the credit card transaction data in your Shortcuts system and eliminates the extra step of using two separate systems to complete one transaction. By integrating this into your software, it keeps more accurate records, and makes checking out a customer faster, easier, and more professional, as well as eliminating any human errors when entering the data.

How?

Using your unique account details [provided by a Merchant Services Provider], Shortcuts then configures the software to work with your system. As part of the setup, you will receive a chip and pin terminal, which connects to your Shortcuts PC, so that you can take the transactions and capture them in Shortcuts. The process is seamless and the system switchover will take place without you even realizing it.

Debit and Credit Card Integration

Benefits of Credit Card Integration with Shortcuts Software

There are some very significant benefits to using Shortcuts Credit Card Integration versus using the "little black box" on the counter.

1. Completely eliminates human error when entering the transaction amount into Shortcuts. Never again can someone type \$1.00 for \$100.00 or 35¢ for \$35.00.
2. Checking out clients becomes a breeze. It can take less than 2 seconds to process transactions, making Reception even more efficient.
3. Eliminates the monthly leasing fee paid to the provider for the physical equipment.
4. Reduces the cost of doing business where advantage is taken of running debit pin transactions versus credit card.
5. Reconciling credit card transactions at the close of day is quick and easy as there is little to no effort required. A report will total up received money from each payment card type and reduce the time spent on end of day processing.

Debit and Credit Card Integration

Your PCI Compliant Merchant Service Provider

Shortcuts works with a PCI compliant merchant service provider to ensure Data Security Standards are met and unparalleled service levels are provided at competitive rates. A merchant service provider verifies all card transactions then processes them with each bank involved. The integrated card payment process in Shortcuts means seamless service for your clients and for the salon too. Contact your Shortcuts representative to find out more.

How do I get it?

The Shortcuts Credit Card Integration is available only to clients on support and maintenance. For specific pricing, please contact your Shortcuts Software representative.
