CLIENT ARRIVALS

The Client Arrivals report displays a list of upcoming appointments for the day. The report includes any clients who have an appointment on the given day that have not yet been checked out. Appointments are listed in order of earliest to latest start time. For each appointment, you can view the client, start time, services, duration, employee, notes, appointment status and resources. This report is a great way for employees to easily view their upcoming appointments, without having to scroll through the Appointment Book.

Tools > Reports > Appointments > Client Arrivals
