

PRODUCTS BY EMPLOYEE

Tools > Reports > Employees > Products by Employee

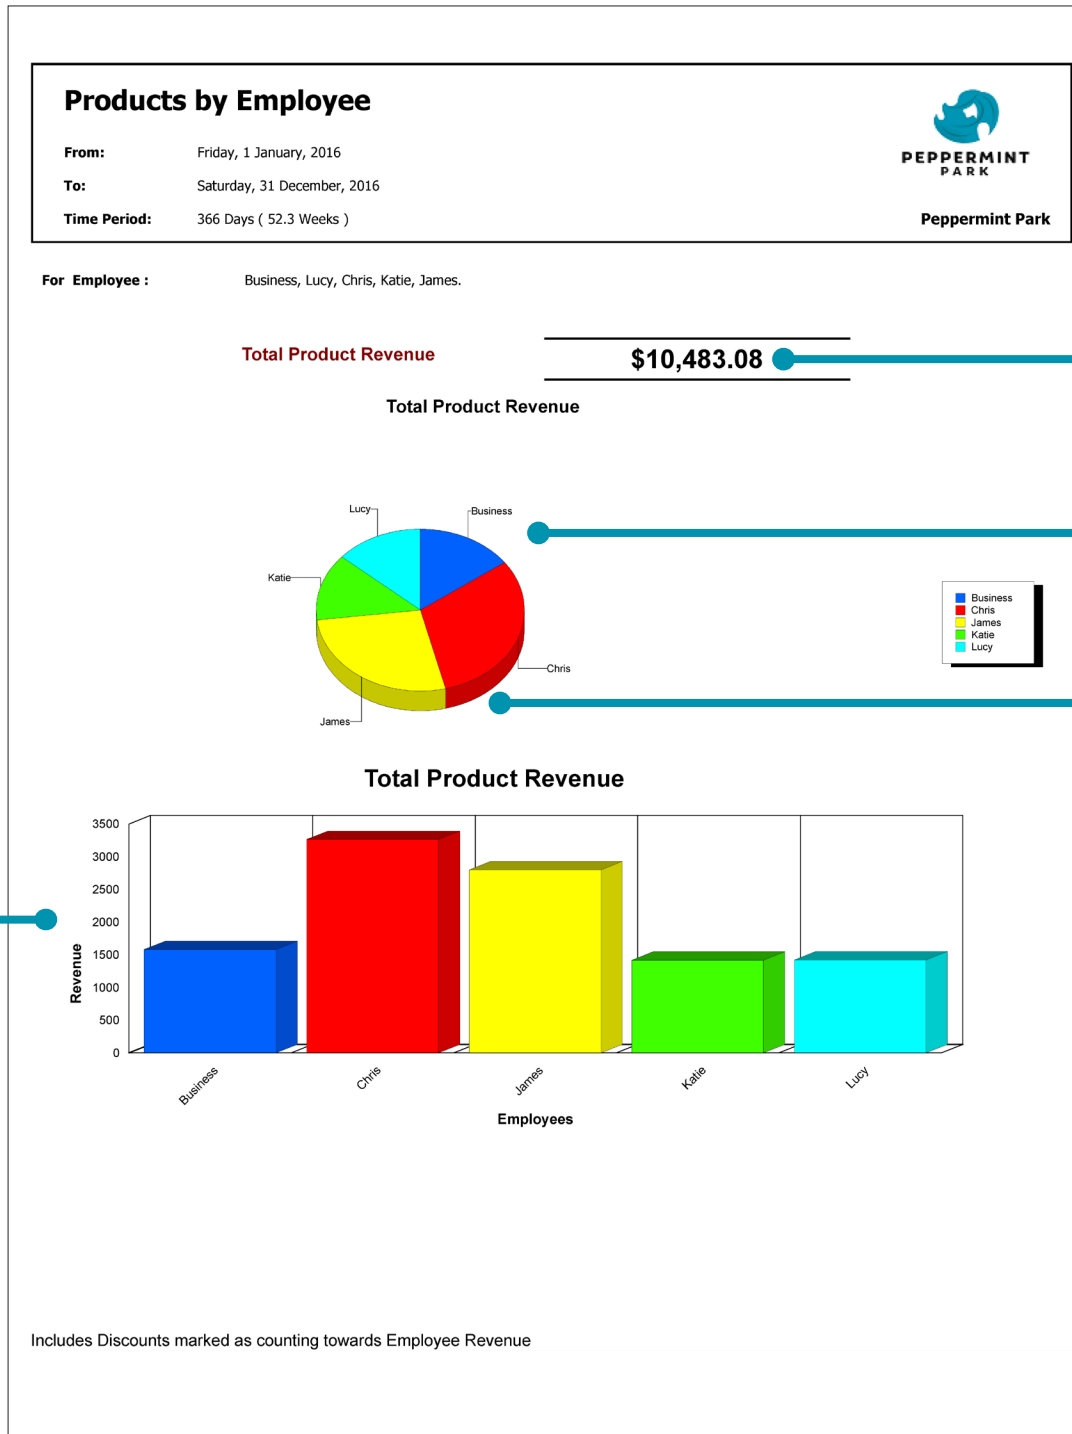

The Products by Employee report is a graphical report which shows a breakdown of product values and product counts for each employee. The report includes charts showing percentages and values generated for each employee.

This report also allows you to drill down to view further details about a particular employee. For example, if you double click on one of the employees in the pie charts or bar graphs it will display a list of all the products sold by that employee.

This report will assist you in analysing employee performance by allowing you to see who sold the highest number of products, and who generated the most product revenue.

TOTAL PRODUCT REVENUE BAR GRAPH

This graph shows the product revenue generated by each employee.

TOTAL PRODUCT REVENUE
The total product revenue for all employees.
