

INVENTORY CONTROL REPORT

Tools > Reports > Inventory > Inventory Control Report

The Inventory Control report displays a detailed list of your product levels, organized in a way that allows you to easily view particular companies and lines. The report includes your current levels, required levels, and what is currently on order. You can also view the cost price and value on hand for each product, line and company. The first page of the report displays the total quantity on hand, quantity on order and value on hand.

This report will assist you in analyzing your product requirements, allowing you to easily see which products need to be included in your next order.

SELL PRICE

The retail price of the product excluding sales tax.

GROSS PROFIT %

The gross profit margin, calculated using the tax exclusive sell price, shown in the following formula:

$$= (\text{Ex Tax Product Sell Price} - \text{Average Product Cost}) / \text{Ex Tax Product Sell Price} * 100$$

QUANTITY IN STOCK

The number of items currently on hand.

Stock Control Report

Report Date: Thursday, 9 June, 2016

Peppermint Park

For Companies: All Companies.

For Retail and Professional Products

WARNING

This is the inventory level at which re-ordering should occur. When the product count falls on or below the warning level, you will receive a re-order warning each time you sell this item at the Point of Sale.

MAXIMUM

The maximum level is the number of items that you aim have after a re-order.

ON ORDER

This is the quantity that is currently on order, but has not yet been received.

AVERAGE COST

When an order containing this item is received, the average cost is calculated based on the average cost method:

$$= (\text{Previous value of inventory on hand} + \text{Total order cost ex-tax}) / (\text{Previous qty of inventory} + \text{Total order qty})$$

BUY PRICE

This is the buy price for the product at the time the report is run. This can be displayed as an alternative to the average cost. You can access this setting through your miscellaneous report options.

VALUE ON HAND

The value of inventory on hand according to the average cost or buy price multiplied by the quantity.
