# APPOINTMENT SCHEDULE ANALYSIS

Tools > Reports > Appointments > Appointment Schedule Analysis

The Appointment Schedule Analysis is a visual report which shows scheduled hours compared to booked hours for each employee. The report includes employee efficiency rates, which is the percentage of total scheduled time that was booked. The first two pages in the report provide a summary of data for each employee, as well as the entire business. Each employee also has their own detailed page within the report. This report will assist you in analyzing employee performance, by allowing you to see which employees have the highest ratio of booked time vs scheduled time. It can also help you recognize daily trends and plan out future schedule requirements.

# SCHEDULED VS BOOKED TIME FOR WHOLE BUSINESS

This graph shows the total scheduled hours and total booked hours for the whole business over the given date range.

# PERCENT OF SCHEDULED TIME PER EMPLOYEE

This graph shows the percentage of total scheduled time that was booked for each employee over the given date range.

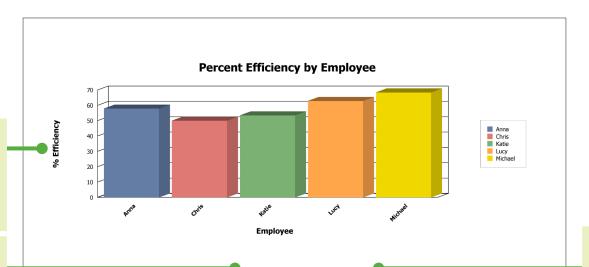

# PERCENT EFFICIENCY BY EMPLOYEE

This graph shows employee efficiency rates, which is the percentage of total scheduled time that was booked.
